Specification

1. The disclosure is objected to because of the following informalities: in amendment to the specification, paragraph [0024], lines 7 and 8, numerals 37 and 35 in "third link 37" and "vent bar 35" have been used repeatedly to represent two different elements.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 13-16, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 2233706A in view of Anderson '716 for the same reasons as stated in last office action, paragraph 8.

Allowable Subject Matter

4. Claims 1-12 are allowed.

5. Claims 17 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed Dec. 27, 2006 have been fully considered but they are not persuasive. Applicant's argument states that the relative positioning of the window (31) in the frame opening (30) is independent of the location of the GB hinge. And that during opening and closing of the sash 31, the GB sash engages a hard stop

on the frame 30, independent of the location of the hinge 11. Examiner disagrees with such assertion. As clearly pointed out by GB, the upper edge 28 of the hinge leaf (or vent bar 19) is in abutting engagement with the stop member 15 and the edge 23b of another link is in abutting engagement with the stop member 16. There is nothing addressing that the sash engages a hard stop on the frame 30 as alleged by applicant. With the teaching of Anderson '716, one skilled in the art would modify the hinge leaf (19) of GB with a shim to adjust the relative positioning of the window sash (31) and the frame opening (30). It may be true that there is no need for the shim when the sash directly engages the frame. However, GB shows the top edge 28 and edge 23b of the hinge parts, not the sash 31, engaging a stop (15, 16).

Further, it may true that there is no need for a shim between the hinge 11 and frame 30. However, the rejection is based on "modify the hinge leaf (19) of GB with a shim as taught by '716", not modify hinge 11 or frame 30.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
